Professional Profile

Junior Frontend Developer with hands-on experience building responsive web interfaces using JavaScript, TypeScript, Angular and React. Comfortable with REST API integration, form validation, component-based development and Git workflows. Motivated to grow in a structured engineering team and contribute to clean, maintainable UI code.

Technologies

Frontend	HTML, CSS, SCSS, JavaScript, TypeScript, Angular, React
UI Libraries	Bootstrap, Angular Material
Tools	Git, GitHub, Fork, VS Code, Postman
Backend basics	Node.js, Express
Databases	MySQL basics, MongoDB basics

Work Experience

Junior Frontend Developer Intern | SoftLab Solutions, Sarajevo | June 2024 - December 2024

- Developed reusable Angular components for an internal CRM application.
- Fixed UI bugs, improved responsiveness and aligned pages with design specifications.
- Connected frontend forms with REST API endpoints and handled loading/error states.
- Participated in code reviews and learned team branching and pull request standards.

Selected Projects

Task Management Web App

Technologies: Angular, TypeScript, SCSS, REST API

- Created pages for listing, adding and editing tasks.
- Implemented form validation and status filters.
- Integrated the UI with mocked and real backend endpoints.

Personal Portfolio Website

Technologies: React, CSS, GitHub Pages

- Built a responsive portfolio with project, contact and technology sections.
- Configured deployment through GitHub Pages.

Education

Bachelor of Informatics, University of Sarajevo, 2020 - 2024
