

Nikola Jovanovic

Machine Learning Engineer

Location	Email	LinkedIn	GitHub/Portfolio
Belgrade, Serbia	nikola.jovanovic@example.com	linkedin.com/in/nikola-jovanovic	github.com/nikolaml

Professional Profile

Machine Learning Engineer with 4 years of experience developing models for text classification, predictive analytics and natural language processing. Experienced in data preprocessing, model evaluation, experiment tracking and deploying ML services.

Technologies

ML/Data	Python, Scikit-learn, TensorFlow, PyTorch
NLP	NLTK, spaCy, Transformers, BERT
Databases	PostgreSQL, MongoDB
Deployment	FastAPI, Docker, AWS EC2
Tools	Jupyter, MLflow, Git, DVC
Visualization	Matplotlib, Seaborn

Work Experience

Machine Learning Engineer | AIWorks, Belgrade | April 2022 - Present

- Developed ML models for classification and user behavior prediction.
- Performed preprocessing, feature engineering and model evaluation.
- Built NLP models for sentiment analysis and topic classification.
- Deployed trained models as REST services using FastAPI.
- Monitored model performance and supported retraining workflows.

Selected Projects

News Sentiment Classification

Technologies: Python, Scikit-learn, BERT, Pandas

- Cleaned, tokenized and prepared text datasets.
- Trained Logistic Regression, SVM and BERT-based models.
- Evaluated results using accuracy, precision, recall and F1 score.

Fraud Detection API

Technologies: Python, XGBoost, FastAPI, Docker

- Created transaction-level features for fraud risk scoring.
- Trained and tuned models for binary classification.
- Built and Dockerized prediction API endpoints.

Education

Master of Artificial Intelligence, University of Belgrade, 2018 - 2020

Soft Skills

- Research mindset
- Critical thinking
- Patience

- Technical presentation
- Cross-functional collaboration
- Independent problem solving
