SUMMARY

Backend engineer with 6 years of experience specialising in Python microservices and API design. Solid experience with AWS and PostgreSQL. Limited frontend experience.

EXPERIENCE

Backend Engineer — Fintech Solutions (2020–Present)

- Developed Python/FastAPI microservices handling 1M+ daily transactions
- Designed PostgreSQL schemas and optimised slow queries (10x improvement)
- Implemented async task queues with Celery and Redis
- Deployed services on AWS using ECS and RDS

Python Developer — DataPlatform Co. (2018–2020)

- Built ETL pipelines using Python and Apache Airflow
- Developed internal REST APIs consumed by frontend teams
- Managed AWS S3 data lake infrastructure

Junior Developer — WebShop Ltd. (2017–2018)

- Maintained legacy PHP application and migrated to Python

SKILLS

- Backend: Python, FastAPI, Django, Flask, Celery
- Databases: PostgreSQL, MySQL, Redis
- Cloud: AWS (ECS, RDS, S3, Lambda)
- Tools: Docker, Git, GitHub Actions, pytest
- Frontend: Basic HTML/CSS, minimal React experience

EDUCATION

BSc Information Systems — University of São Paulo (2013–2017)
